Summary

Enthusiastic and motivated full-stack Java developer with a solid foundation in Java programming and web development. possessing strong problem-solving abilities and a passion for learning new technologies. Skilled in front-end and back-end development, including proficiency in HTML, CSS, JavaScript, React and Java, Oracle database. Eager to leverage academic background and hands-on project experience to contribute effectively to a dynamic development team

Education

- *B-TECH* | Godavari Institute of Engineering and technology, Rajahmundry | 7.9 CGPA | 2020 – 2023
- Diploma | Government Polytechnic Narsipatnam | 8.2 CGPA | 2017-2020
- SSC | Z. P high School, Pedaboddepalli | 87% | 2016-2017

Skills

- Technical Proficiencies: Java | Html | CSS | Java Script | React | Boot Strap | SQL | PL/SQL| C | OOPS | Spring framework | Spring MVC | Git/GitHub | XML | Postman | Spring Boot | Data JPA
- Soft Skills: Team Work | Strategic Planning | Communication | Adaptive Learning | Self-Motivation

Work Experience

Associate intern

Spy D Technology
Hyderabad

- Current/Madhapur,

- Designed Scalable, testable code with 95% positive feedback from mentors
- Discovered and fixed 20+ programming bugs.
- Professionally engaged in collaborative efforts with team members and fellow developers to achieve project objectives. Contributed actively to brainstorming sessions and problem-solving initiatives, fostering an environment of open communication and idea exchange

Personal Projects

Job Portal Webpage

- I developed and designed a modern, user-friendly job portal webpage, tailored to meet the needs of both job seekers and employers. Through extensive research, market analysis, and understanding of user preferences, I was able to inform the design process and improve the overall user experience. The portal effectively streamlines the job search process for freshers, making it easier for them to find relevant opportunities.
- Incorporating responsive design principles and optimizing system performance, I achieved a 35% increase in system efficiency, along with a 25% boost through resolving technical issues. My efforts resulted in a significant 20% improvement in overall system proficiency.

Home Power/Current Bill Preparation Using Programming

- I engineered a smart home power and billing system leveraging my programming skills to automate usage monitoring, analysis, and bill preparation. By integrating automated functionalities, I significantly improved the system's efficiency by 20%, streamlining the entire billing process. The enhanced printing capabilities allowed for the generation of detailed billing information, providing users with more comprehensive insights into their power consumption.

- In addition, I developed a user-friendly interface for easier input and access to billing information, ensuring a seamless experience for users. To maintain the system's accuracy and reliability, I implemented robust error-handling mechanisms for data validation, minimizing discrepancies in billing statements. By identifying and resolving technical issues, I achieved an additional 20% improvement in system efficiency.

Designed Institute Web Page

- I designed and developed an institute's webpage, utilizing HTML, CSS, and JavaScript to create an intuitive and user-friendly platform. The webpage featured smooth navigation, visually appealing layouts, and interactive JavaScript elements, making it easier for users to discover and purchase courses. By focusing on streamlining the interface, I contributed to making education more accessible and enjoyable for learners, significantly improving the overall user experience.
- Additionally, I implemented a user-friendly interface for data input, ensuring accurate and expected outputs. Throughout the project, I identified and resolved technical issues, improving both my skills by 25% and the system's performance by 20%. My code modernization efforts helped deliver a highly efficient and responsive website for the institute.

Company Web Site

- I designed and developed a comprehensive company website that integrates both consultancy and IT services, catering to the specific needs of clients in both sectors. By utilizing modern web technologies like HTML, CSS, and JavaScript, I created a visually appealing and user-friendly platform that offers seamless navigation between the consultancy and IT sections. The website's layout was crafted to enhance user engagement, allowing clients to easily explore services, access resources, and make informed decisions.
- Through a user-centric approach, I ensured the website not only highlighted the company's expertise but also provided an intuitive interface for users to interact with. Additionally, I implemented modern coding techniques that optimized performance, resulting in a 20% increase in system efficiency. By addressing technical challenges and improving my skills in the process, I contributed to the development of a fast, responsive, and reliable platform that effectively represents the company's diverse services.

Certifications

- TCS(NQT)-Scorecard-2023
- INFOSYS-Course Completion Certificate (JAVA)
- HEWLETT PACKARD ENTERPRISE-Software Engineering Job Simulation on [Forage](#)(JAVA)-Oct 2024
- WALMART USA-Software Engineering Job Simulation on [Forage](#)-Oct 2024
- Career Essentials in Software Development By MICROSOFT and LINKEDIN

Achievements

- Organized an event at university
- Organized a blood camp

Languages

- English - Full proficiency
- Telugu - Full proficiency
- Hindi – Limited proficiency
